Thank you for your quick and efficient response. We are going to place a layer of 1.25" firebrick on the bottom to safe guard this unit. We absolutely love this system and it is a God sent in Northern Michigan Winter. We experience frequent power outages and have been very comfortable during these episodes. It doesn't get any better than lasagna, fresh bread, and hot tea from the oven by candle light.

We have been in this house for 3 years and have had to pay a \$75 fee for low propane usage all three years and we are heating a 2400 sq ft house, two story. Just an amazing unit.

Thank you again.

David Klebba
