RE: Final Energy Star Certification

Dear Mr. Armstrong,

Congratulations! Final plan analysis confirms that 283 Aldrich Road, Uxbridge, MA has passed the Massachusetts New Homes with ENERGY STAR® requirements. Please review the enclosed ENERGY STAR report and pay particular attention to the HERS Index scoring. The lower a home's HERS Index, the more energy efficient it is in comparison to the HERS Reference Home-based on 2006 IECC residential requirements.

GDS Associates, an ENERGY STAR Partner and your rating provider, is pleased to have assisted you in the Energy Star process. We continue to provide plans analysis, on-site technical training, diagnostic testing and final reporting for the Massachusetts New Homes with ENERGY STAR program. Please feel free to contact us with questions about your ENERGY STAR report or to inquire about our services.

We look forward to working with you in the future.

Sincerely,

Brian C. Adams, HERS
